

MAVEN INTERVIEW QUESTIONS

Mithun Technologies, +91 99809 23226, devopstrainingblr@gmail.com

A large, faint watermark of the Mithun Technologies logo is centered on the page. The logo consists of a stylized blue 'T' shape with a bird-like figure integrated into its vertical stem. Above the 'T' is a green arch, and below it is the text 'Mithun Technologies' in a blue, sans-serif font.

---	---	----------------------------------	--

What is profile? How to run specific profile?

Ans)

What is snapshot ?

Ans)

What is release?

Ans)

What is maven plugin installed in Jenkins?

Ans)

What are the maven phases and goals? which ones runs first?

Ans)

What are Maven goals and phases and what is their difference?

Ans)

Goals are executed in phases which help determine the order goals get executed in. The best understanding of this is to look at the default Maven lifecycle bindings which shows which goals get run in which phases by default. The compile phase goals will always be executed before the test phase goals which will always be executed before the package phase goals and so on.
